

HARDOCK'S® Neutra-Syrup Neutralises & Removes™

Australia and New Zealand: MILD DIURETIC AND URINARY ALKALISER FOR HORSES AND GREYHOUNDS.

PRESENTATION: Highly palatable syrup for daily addition to the feed.

ACTIVE CONSTITUENTS: Each 30 mL dose contain:

CITRIC ACID BP	7.5 g
SODIUM (Na ⁺) IONS	1.4 g

PROPERTIES: HARDOCK'S® Neutra-Syrup Neutralises & Removes™ is a palatable mild diuretic that increases the volume of urine excreted, increases the thirst and fluid intake, whilst providing a beneficial urinary alkalising action to flush the kidneys of excess acid after fast exercise. HARDOCK'S® Neutra-Syrup Neutralises & Removes™ assists in the treatment and prevention of dehydration by encouraging a horse to drink more water, especially when administered routinely after training. When given on fast work days, it helps to neutralise and flush the system of lactic acid or correct "acidosis" due to the accumulation of excess acid within the blood, after fast, anaerobic exercise especially in unfit horses in early training. HARDOCK'S® Neutra-Syrup Neutralises & Removes™ is also beneficial in helping to reduce the symptoms and risk of 'tying up' in horses and muscle cramping in racing greyhounds.

The production of lactic acid is a natural result of fast exercise or racing, work, and some animals need assistance to neutralise the excess body acid to help avoid muscle soreness, associated loss of appetite and speed up recovery process. HARDOCK'S® Neutra-Syrup Neutralises & Removes™ is formulated for these purposes with special flavours and additives, which not only makes administration easy as horses and greyhounds accept it readily, but in many cases can also improve the appetite of hard working horses.

DOSAGE AND ADMINISTRATION: The cap of 1 and 5 L container measures 15 mL.

HORSES

30-60 mL/day in the feed

GREYHOUNDS

5 mL/day in the feed

By law the user must take due care, obtaining expert advice when necessary, to avoid unnecessary pain and distress when using this product other than as directed on the label (New Zealand).

CAUTION: Adequate cool, clean drinking water should be available at all times.

MEAT WITHHOLDING PERIOD: Nil (Australia and New Zealand)

POISONS SCHEDULE: Nil (Australia and New Zealand)

REGULATORY STATUS:

Australia:	AUSTRALIAN PESTICIDES & VETERINARY MEDICINES AUTHORITY
New Zealand:	Registered pursuant to the ACVM Act 1997, No. A009657. Seek veterinary advice when treating horses suffering tying up syndrome.

PACK SIZES:

	<u>No. of horse doses</u>	<u>No. of greyhound doses</u>
1 L	33 x 30 mL	200 x 5 mL
5 L	166 x 30 mL	1000 x 5 mL
25 L	833 x 30 mL	5000 x 5 mL
